

# KAIST-RIKEN

## Joint Symposium on Cell & Developmental Biology

### KAIST

Giltsu Choi  
(Gravitropism in plant)  
Kwang-Wook Choi  
(Eye development in Drosophila)  
Yong-Mahn Hahn  
(Human Stem cell)  
Won-Do Heo  
(Cell signaling and imaging)  
Eunjoon Kim  
(Synaptic signaling)  
Jin-Woo Kim  
(Mammalian retina development)  
Dae-Sik Lim  
(Mammalian Hippo signaling)

### RIKEN CDB

Mototsugu Eiraku  
(ES cell-derived retinal epithelium)  
Shigeo Hayashi  
(Cell shape control in Drosophila)  
Takeshi Imai  
(Mouse olfactory system)  
Erina Kuranaga  
(Histogenesis in Drosophila)  
Fumio Matsuzaki  
(Orienting cell polarity)  
Guojun Sheng  
(Vertebrate early embryogenesis)

### *Special Lecture*

*Masatoshi Takeichi (Cell junctions and tissue patterning)*

9:50 AM-5:30 PM  
November 30, 2011

-KAIST Biomedical Research Center Auditorium -

Organized by the KAIST Dept. of Biological Sciences  
and BK21 BioKAIST
